## LIST 2811

THIS LIST COVERS STOCK OFFERED BY

# CLARKE NURSERY CO.

SAN JOSE, CALIF.

SEASON 1928-1929

### PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

**TERMS.** To buyers of known or established credit. 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

**GRADING.** Plants that are wider than they are tall are graded by width.

**QUANTITIES.** Five or more plants of one kind and size will be supplied at 10 rate; 50 or more at 100 rate; 500 or more at 1000 rate.

**POTS.** Prices on pot grown stock do not include the pots and unless otherwise instructed plants will be removed from pots before shipping. If wanted in the pots they will be charged for at cost, but can be returned if desired and credit will be given.

**PACKING.** Will be charged for at cost as usual. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped.

**SHIPPING.** Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

**NOMENCLATURE.** Plant names, both botanical and common, have been revised to conform with 1923 edition of "Standardized Plant Names," with the addition of a few common names widely used on the Pacific Coast.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net. Landscape Architects and Landscape Gardeners who are not actual nurserymen will be charged 20% in addition to the rates quoted herein.

Both firms are members of

CALIFORNIA ASSOCIATION OF NURSERYMEN

# NOVELTIES AND SPECIALTIES

Special attention is called to the following items. Sizes and prices will be found in the proper division of this list.

## CONIFERS

**CHAMAECYPARIS lawsoniana stewarti.** Our best golden-hued conifer. All winter when Golden Arbor Vitaes lose their color this is at its brightest.

**CHAMAECYPARIS lawsoniana wisseli. WISSEL CYPRESS.** Growth narrow and erect. Color sage or blue green. Foliage moss like. Rare and beautiful.

**CUPRESSUS glabra stricta.** A chance seedling. Growth much like Italian Cypress but becomes thicker at base. Color bright silvery blue. All plants offered are grafted, hence uniform.

**CUPRESSUS sp. SILVERSPRAY CYPRESS.** An interesting and beautiful Cypress with strongly drooping branches. Foliage glaucous. If main stem is kept staked it appears like a living fountain. Very fine. Species not known.

**PINUS armandi. ARMAND PINE.**

A new pine from China said to attain large size. Growth here is dwarf at first. Its long silvery needles and odd habit give it great value for rockwork, Japanese gardens and as a pot plant of very unusual appearance.

**TAXUS baccata fastigiata. IRISH YEW.** This has been almost unobtainable for years, but we are now able to supply it in a good range of sizes.

**THUJA orientalis beverleyensis.** Not a novelty, but still far from common. Growth erect and slender. Color vivid gold except in winter. As it does not sunburn it is entirely supplanting the old *Thuja aurea* conspicua to which it is superior in every way.

## BROAD LEAVED EVERGREENS

**ARBUTUS menziesi. MADRONE.** Probably our most beautiful native tree. Hard to propagate and of slow growth at first, it has always been scarce. We are now able to furnish it in quantity.

**CEANOTHUS arboreus hybridus.** Flowers range through every shade of blue from palest lavender to deepest violet.

**COTONEASTER harroviana.** Surpasses all other Cotoneasters in the profusion of red berries.

**COTONEASTER Standards.** By top grafting the various Cotoneasters on straight stems at various heights a unique effect is obtained. This is particularly striking in the prostrate varieties such as *C. horizontalis*, *microphylla*, *prostrata*, etc.

**PHOTINIA arbutifolia. TOYON, CHRISTMAS BERRY, CALIFORNIA HOLLY.** Although extremely popular this is very difficult to grow successfully for the first two years from seed. By careful study we have mastered the process and have by far the largest stock in the country.

**PHOTINIA serrulata.** (New form from China). Raised from seed imported from China. It is quite distinct from the plant we have had for years in California under this name. Leaves have slightly prickly margins, new growth is red and the whole appearance is very attractive indeed. Ought to become very popular.

**PITTOSPORUM phylliracoides. WILLOW PITTOSPORUM.** Although very popular in Southern California it is almost unknown in other parts of the State. It is absolutely hardy in San Jose with a usual winter temperature of 24° so will thrive in most sections of California. Has the appearance and habit of an evergreen Weeping Willow.

## DECIDUOUS TREES

**BETULA pendula youngi. YOUNG'S WEEPING BIRCH.** Has the usual white trunk. Entirely different from Cut-leaved Birch. The main branches are very drooping and tree is entirely free from formality or stiffness.

**POPULUS tremula pendula. WEEPING POPLAR.** Top grafted on erect stems it makes a very picturesque tree. A table with benches is often built around the trunk. Very striking when in bloom as the catkins are several inches long.

**ROBINIA hispida macrophylla.** This is probably the most beautiful flowering tree that can be grown in this country. It is far superior to the old "Rose Acacia," which is beautiful enough. The flowers are the size and shape of sweet peas, borne in large clusters and a lovely shade of soft pink. Top grafted it makes a fine round headed tree or budded low a handsome shrub.

**SALIX** *babylonica annularis*. Ringleaf Weeping Willow. Not new but rare. Growth more erect than Common Weeping Willow but with same drooping branches as it attains age. Its marked characteristic is the shape of the leaves. Each one is curled into a complete circle or ring giving the tree a most unusual and attractive appearance.

#### DECIDUOUS SHRUBS

**FORSYTHIA** *intermedia spectabilis*. Far ahead of all the older Forsythias. Will outbloom any of them two to one. The color is a deep golden yellow, not pale like most. Further, it has long erect shoots which are covered with flowers the second year. Not only a fine garden shrub but should be very valuable for those who grow cut flower material for the florist trade.

**LILACS**. We have specialized in Lilacs since we started business and have one of the very best commercial collections in the country. We have dropped all but the best of the older sorts, as the new ones are so superior. We offer the latest European novelties including several of the new "Early Flowering Lilacs," a distinct race which flower 2 or 3 weeks ahead of the ordinary kind. A marked feature of many of these new kinds is their great vigor. There is no use of being satisfied with inferior sorts, 30 or 40 years old, when this magnificent collection is available. See under SYRINGA.

#### CLIMBERS

**WISTERIA** *multijuga longissima*. A form of the Japanese Wisteria with exceptionally long clusters. The first crop will usually run 3 ft. which increases to 4 ft. as the plants get stronger. Ultimately some 5 ft. clusters will develop and the old original vine has actually produced a few clusters which reached the startling length of 6 ft. This may sound exaggerated, but is not.

**WISTERIA** *multijuga rosea*. PINK WISTERIA. Our stock is guaranteed to be absolutely genuine pink.

**WISTERIA** Mrs. McCullough. A distinct unknown variety. The color is a genuine deep purple which others are not, regardless of names. Clusters are short but full, finely formed and with very large individual flowers. First of all to bloom.

#### MISCELLANEOUS

**HESPEROYUCCA** *whipplei*. This is our native yucca whose enormous flower spikes lend so much beauty to the foothill region of southern California. Is not long in coming into bloom. Flower spikes often 10 or 12 ft. tall with hundreds of flowers.

# CONIFERS

about

NOVELTIES and SPECIALTIES

# FLOWERING FRUIT TREES

All plants in this section will be dug with bare roots.

N. B. Our Almonds, Cherries, Peaches and Plums are grown outside the Peach Root Borer district, so can be shipped anywhere.

## FLOWERING ALMONDS

### ALMOND, Double Pink

This is not the dwarf bush Almond but a tree closely resembling a flowering Peach and often mistaken for it. Very profuse bloomer.

	each rate	10 rate	100 rate
4 to 6 ft.....	\$ .75	\$ .60	\$ .50

## FLOWERING APPLES

### MALUS ioensis bechteli, BECHTEL CRAB

3 to 4 ft.....	1.00	.70	.60
2 to 3 ft.....	.75	.60	.50

### "Large Flesh Pink"

8 to 10 ft.....	1.25	1.00	.75
6 to 8 ft.....	1.00	.75	.60
4 to 6 ft.....	.75	.60	.50

### niedzwetzkyana, REDVEIN CRAB

8 to 10 ft.....	1.25	1.00	
6 to 8 ft.....	1.00	.75	.60
4 to 6 ft.....	.75	.60	

### spectabilis, CHINESE DOUBLE FLOWERING CRAB

4 to 6 ft.....	1.00	.75	
----------------	------	-----	--

## FLOWERING APRICOTS

### PRUNUS mume Dawn (double pink)

6 to 8 ft.....	1.00	.75	.60
4 to 6 ft.....	.75	.60	.50

## FLOWERING CHERRIES

Although we specialize in the Flowering Cherries, demand is so great that we are entirely sold out for this season. Next year we expect to offer about 25 of the very best Japanese varieties correctly named. We urge our customers to place orders during the summer to ensure a stock of these beautiful and increasingly popular trees.

## FLOWERING PEACHES

### Assorted varieties as below

4 to 6 ft.....	1.00	.70	.60
3 to 4 ft.....	.75	.60	

### Burbank (double pink)

### Double Red (late)

### Camelliaflora (double pink)

### Double White

### Clara Meyer (double pink)

### Early Red

### Double Cerise (late)

# DESCRIPTIONS OF LILACS

## NOVELTIES

JAN VAN TOL—Single white. Both the clusters and the individual flowers are of enormous size. A very good grower and free bloomer.

PRESIDENT FAILLIERES—Double, lavender pink. Color charming. Trusses simply enormous. Flowers large and very double. Truly magnificent and easily the best.

PRESIDENT POINCARE—Double. Claret mauve with purplish buds. Clusters of good size with very large, full double flowers. Very fragrant.

1928 Set

Offered for the first time last spring.

\*BUFFON—Single; mauve pink; elegant flowers with reflexed lobes.

\*DESCARTES—Single; mauve pink. Exceedingly free blooming.

DIDEROT—Single; deep purple; buds almost black. Clusters very long and narrow.

EDITH CAVEL—Double; milk white. Buds tinted deep cream. Handsome clusters with fine individual flowers.

EDOUARD ANDRE—Double; rose or nearly pink.

\*LOUVOIS—Single; violet purple suffused blue. Flowers very large in ample clusters.

MONTAIGNE—Double; pinkish mauve. Very large clusters.

MONT BLANC—Single; pure white. Clusters large, flowers enormous. Very fragrant. Splendid.

WALDECK-ROUSSEAU—Double; deep violet flowers, borne in long trusses.

## GENERAL COLLECTION

### Double Varieties

CHAS. SARGENT—Violet mauve blended sky blue; enormous flowers and clusters.

\*CLAUDE BERNARD—Bright mauve. Included in the "Early Lilacs" but really in a class by itself and distinct from all others. Petals are long and wavy or twisted. Largest flowers are an inch broad. Very fine.

CONDORCET—Almost pure blue. Semi-double.

ELLEN WILLMOTT—Snow white; elegant spikes; fine large flowers of the "hose in hose" type of double.

EMILE GENTIL—Bright cobalt-blue.

GEORGES BELLAIR—Buds carmine, opening purple. Profuse bloomer.

HIPPOLYTE MARINGER—Purplish-mauve; compact clusters.

JEAN BART—Rosy-violet, buds carmine. Petals acute and twisted. Unique.

JEAN MACE—Mauve changing to blue.

JEANNE D'ARC—White. Flowers very large. Clusters beautiful and compact.

LA TOUR D'Auvergne—Dark lilac, good.

LEON GAMBETTA—Pink-lilac, early; regular imbricated flowers.

MARECHAL LANNES—Mauve changing to pinkish blue. Beautiful color. Flowers unusually large. Very fine.

MAXIMOWICZ—Violet-heliotrope, reverse silvery.

PRESIDENT LOUBET—Purple changing to lilac.

PRESIDENT VIGER—Purple becoming blue. Clusters large.

ROSEA GRANDIFLORA—Rosy-lilac; fine panicles.

\*VAUBAN—Pale mauve pink. Panicles large. Delicious fragrance. Extremely free bloomer.

VICTOR LEMOINE—Azure-mauve, fading to flesh pink.

### Single Varieties

CHRISTOPHER COLUMBUS—Light lilac blue, buds purple; very fine and large.

DE MIRIBEL—Dark bluish-violet; long compact panicles; very fine.

DR. BREITSCHNEIDER—Pure pink. Blooms on new wood, hence late.

DR. LINDLEY—Brilliant violet-purple, buds red.

EDMOND BOISSIER—Dark purple. Flowers very large.

GLOIRE DE LORRAINE—Dark lilac becoming blue.

\*LAMARTINE—Mauve pink changing to nearly blue. Clusters much forked. Flowers large. Very vigorous and one of the very earliest.

LUDWIG SPAETH—Dark purple. Clusters long and slender.

LUTECE—Pink; very late. Blooms on new wood.

MARIE LEGRAYE—White; early. An old favorite.

\*MIRABEAU—Mauve, the earliest of all.

NIGRICANS—Bluish lilac.

\*PASCAL—Pure lilac; very free. Dwarf habit.

PERLE VON STUTTGART—Pure white. Both flowers and clusters very large.

VESTALE—White; flowers large. Our earliest white variety.

\*Varieties starred are the new "Early Lilacs." These are hybrids between *Syringa giraldi* and the earliest varieties of *S. vulgaris*. They are very distinct from previous varieties in both appearance and habit. They are ten days to two weeks earlier and the clusters are borne well above the foliage at the ends of long erect branches. Leaves are only partially developed when they bloom. These features give them very great value as cut flowers. We recommend them highly.

### WISTERIAS—All Grafted

N. B.—Field grafts are rather slender for their height or length and usually not branched.

Bench grafts (2 to 4 years) are not as tall, but are heavier, stockier and usually well branched. Most of the older bench grafts offered have already bloomed in the field.

NOVELTIES and SPECIALTIES

# ROSES

---

We grow and handle roses very extensively.

Our assortment of varieties is one of the most complete in the country including all the old ones that are good and the best of American and European novelties.

Everyone interested in or handling roses should have our list. If you have no copy on file write us for LIST 2805 and we will mail it promptly.

---

## PLEASE NOTE

---

This price list covers only stock offered by Clarke Nursery Co., San Jose, Calif.

We also act as marketing agents for several other concerns so are in a position to supply almost anything in the nursery line available on the Pacific Coast.

If you don't find what you want in this list write us about it.
